Professional Summary

Business operations and commercial control professional with more than 6 years of experience across manufacturing, engineering services, and heavy equipment industries. Experienced in profitability analysis, cost control, operational governance, ERP systems, management reporting, and business process improvement.

Currently supporting VP Operations in a business-critical role, acting as commercial and operational first-line reviewer, ERP owner, reporting analyst, and operational problem solver. Proven ability to support management decision-making through operational analytics, dashboard development, workflow automation, and cross-functional coordination.

Strong background in SAP, Odoo ERP, Excel, Google Sheets, Looker Studio, and reporting automation with hands-on experience in operational monitoring, pricing discipline, margin protection, and executive reporting.

Core Competencies

- Business Operations & Commercial Control
 - Cost Control & Profitability Analysis
 - Management Reporting & Executive Dashboards
 - ERP Systems (Odoo & SAP)
 - Operational Governance
 - Reporting Automation
 - Data Analysis & Visualization
 - Workflow & Process Improvement
 - Cross-Functional Coordination
 - Operational Monitoring
 - Purchase & Commercial Review
 - Business Process Troubleshooting
-

Technical Skills

ERP & Systems

- Odoo ERP
- SAP ERP
- ERP Operational Flow & Troubleshooting

Data & Reporting

- Microsoft Excel (Advanced)
- Google Sheets (Advanced)
- Pivot Tables
- Complex Formulas & Data Modeling
- Looker Studio
- Power BI
- Data Visualization
- Executive Reporting

Automation & Tools

- Google App Script
- VBA / Macro Automation
- API Integration
- UiPath
- SQL (Basic to Intermediate)
- BigQuery (Basic)

Business & Commercial

- Cost Control
 - Profitability Analysis
 - Operational Monitoring
 - Pricing Discipline
 - Commercial Governance
 - Executive Presentation
-

Professional Experience

PT Nobi Putra Angkasa

Business Operations & ERP Analyst / VP Operation Assistant

2024 – Present

Manufacturing Industry – Electrical Panels & Cable Tray

Key Responsibilities

- Act as commercial and operational first-line reviewer before VP Operations approval, evaluating Sales Orders, Purchase Requests, and Purchase Orders to ensure profitability, pricing discipline, and administrative compliance.
- Serve as ERP owner (Odoo) post-migration, supporting users across departments and continuously improving workflows aligned with operational business needs.
- Provide data-driven decision support to VP Operations through dashboards and analytical reporting covering sales, purchasing, accounts receivable, operational performance, and end-to-end business flow visibility.
- Develop reporting automation workflows using Excel, Google Sheets, App Script, VBA, and Looker Studio to improve reporting visibility and operational efficiency.
- Coordinate between departments including sales, finance, procurement, warehouse, and operations to resolve operational and commercial process issues.
- Support operational monitoring activities including stock opname evaluation and reporting analysis.

Key Achievements

- Successfully supported migration from legacy Scala system to Odoo ERP within approximately 4 months with minimal operational disruption.
 - Improved reporting visibility, operational monitoring, and management reporting capability after ERP implementation.
 - Developed automated and semi-automated reporting pipelines, significantly reducing manual reporting effort.
 - Became key operational support contact for ERP troubleshooting, management reporting, and operational data analysis.
-

PT Cibuni Teknik Sejahtera

Project Manager

2022 – 2024

Engineering Services Industry

Key Responsibilities

- Managed operational setup and business activities for engineering service operations.
- Coordinated project execution, manpower readiness, operational support, and customer service activities.
- Oversaw billing coordination, project monitoring, and operational process management.
- Balanced operational capacity, cost structure, and pricing considerations to maintain sustainable profitability.

Key Achievements

- Supported operational establishment and business readiness for a growing engineering services company.
 - Coordinated multiple operational functions including project execution, operational support, and customer satisfaction.
 - Improved operational coordination and business process management across multiple service activities.
-

PT Traktor Nusantara

Service Profitability & Business Control

2021 – 2022

Heavy Equipment Industry

Key Responsibilities

- Monitored service profitability and operational business performance across maintenance contracts and operational service activities.
- Coordinated with branch managers, finance teams, and operational teams regarding pricing, profitability, operational cost structures, and business performance monitoring.

- Created quotations and monitored quotation progress for extension item sales initiatives.
- Coordinated with finance and accounting teams during month-end closing processes, including journal review, ledger abnormality analysis, and management explanation support.
- Evaluated maintenance contracts and customer operational activities to determine profitability sustainability and operational feasibility.
- Reviewed purchase orders and operational cost structures to support commercial governance and margin protection.
- Supported management and general managers with analytical reporting, dashboard development, operational insights, and executive presentation preparation.

Key Achievements

- Developed a comprehensive service contract profitability and maintenance planning calculator presented to the Board of Directors.
- Built operational simulation models incorporating maintenance schedules, labor estimation, transportation costs, customer location analysis, operational hour forecasting, inflation assumptions, mechanic allocation planning, and profitability simulations.
- Built executive dashboards using Looker Studio to monitor service and contract profitability for management-level decision making.
- Supported improved operational visibility and profitability analysis for maintenance contracts with monthly revenues approximately IDR 8–10 billion.
- Frequently became a direct support resource for management regarding reporting, operational analysis, and business insight generation.

Cost Control Staff / Analyst

2019 – 2021

Key Responsibilities

- Managed operational expense reporting, cost monitoring, and operational spending analysis.
- Proposed and monitored cost reduction initiatives across operational activities and service operations.
- Coordinated with operational teams to improve cost governance, spending visibility, and operational efficiency.
- Developed analytical monitoring tools, reporting structures, and operational dashboards using SAP, Excel, and Google Sheets.
- Supported digitalization and operational improvement initiatives related to procurement, reimbursement, and operational monitoring.

Key Achievements

- Proposed and helped implement controlled fuel reimbursement system using centralized e-money top-up mechanism in partnership with Pertamina.
 - Improved operational expense monitoring and reimbursement control visibility.
 - Developed workforce planning and operational monitoring tools to support mechanic allocation and maintenance activities.
 - Performed historical profitability analysis for maintenance contracts with monthly revenues approximately IDR 8–10 billion, identifying operational cost gaps and supporting improved profitability evaluation.
 - Contributed to operational reporting improvements and analytical visibility for management monitoring.
-

Internship Experience

PT Astra Agro Lestari

Engineering Intern

2018

- Supported operational and engineering-related activities during the internship program.
 - Gained exposure to industrial operational processes and corporate working environment.
-

Education

Bachelor of Mechanical Engineering – International Program

Universitas Indonesia

Graduated: 2019

GPA: 3.22 / 4.00

- Thesis focused on energy efficiency optimization in steam power plants.
 - Exchange Student at entity["organization","Tokyo Institute of Technology","Tokyo, Japan"] (2018) for numerical analysis research project.
-

Additional Information

Languages

- Indonesian (Native)
- English (Professional Working Proficiency)
- IELTS Score: 6.5 (2018)

Projects & Analytical Interests

[Investment Analytics & Macro Intelligence Platform](#) | 2026 – Present

- Developed an automated investment analytics platform covering equities, crypto, bonds, commodities, FX, and macroeconomic indicators.
- Integrated multiple external data sources including FRED, Google Finance, Google News RSS, TradingView, and OpenAI API.
- Built automated data pipelines using Google Apps Script to collect, process, and visualize financial data.
- Implemented AI-powered market commentary and portfolio allocation recommendations.
- Designed interactive dashboards using Looker Studio and custom HTML/CSS/JavaScript frontend.
- Created a Central Bank Monitoring system covering Fed, ECB, BOE, BOJ, Bank of Canada, RBA, and Bank Indonesia policy rates.
- Reduced manual market monitoring effort by consolidating macroeconomic, technical, and news data into a single analytics platform.

Other Project

- Built operational and financial decision-support dashboards using external data integration.
- Integrated Odoo operational data into Google Sheets through API-based workflows.
- Explored AI-assisted reporting and automation systems for operational analysis.

Professional Strengths

- Strong analytical and problem-solving mindset
- Experienced in management-level operational reporting and business analysis
- Able to bridge business operations with technical and system-based solutions
- Fast learner for ERP systems, workflows, and operational processes
- Comfortable handling cross-functional operational coordination and troubleshooting
- Self-driven in learning automation, reporting systems, and process improvement
